Asian Centre for Cochlear Implant for the first time

The girl was suffering from the intestines of a 14 year old girl rope of hair was extracted from ever treated in India, 1.5 meter

New lease of life for kidney patient

Asian hospital is one of the most advanced of the art in the whole of north India. The hospital is catering across the local area in which it is situated.

Give your heart a second chance

A Super Specialty Hospital & Cancer Centre

Help in time can SAVE LIFE

India has the highest incidence of heart related diseases in the world & the number of those affected is likely to double in the coming years.

At the Asian Heart Centre, we provide a highly advanced facility for Heart & Lung & other Major Vessels of the Heart.

From the Chairman’s Desk

Dear Readers,

Wishing you a happy and healthy New Year.

This is the second time that we have been presented an opportunity to interact with you through the pages of this magazine & before going any further I would like to congratulate everyone of you for the inauguration of Asian Clinics at Greater Noida in Delhi. This clinic which can be described as a luxury health care experience brings a completely new perspective to healthcare. As you walk through the reception you are not greeted by the familiar smell of antiseptic but instead by beautiful hostesses with their warm and welcoming smiles, a wealth of fresh cut flowers and the faith that you are among the very best medical professionals in the country.

Great ideas have greater responsibilities and the goals in healthcare are to safeguard, encourage and at times cultivate the social fabric of society as a whole. At the Asian Hospital, we cater to the public the benefits of the very modern and technological developments while keeping focus on quality, affordability and accessibility.

Life came to a standstill for Govind from India, when he visited India. Life was not an easy job for Govind as he was born with heart failure and was to be operated on within a few days he was a mute & cochlear implant was the answer. As a patient he was the best the medical team had ever come across.

Heart & Lung Voted among 10 Best Multi-specialty Hospitals in Delhi NCR

The management of asian hospital is dedicated to the care of their patients in a warm, caring and relaxed setting. The hospital's professional staff is committed to delivering the finest patient care, using the most advanced medical technology and facilities. The hospital is equipped with state-of-the-art technology and is fully accredited by NABH and ISO 2008 standards. Asian hospital is proud to offer patients the latest in medical technology and advanced surgical procedures.

Asian hospital is committed to providing the highest quality of care to patients in a state-of-the-art facility.

A Hope for Cancer Patients

Asian hospital is one of the best cancer hospitals in Delhi NCR with advanced facilities and equipment.

A SUPER SPECIALTY HOSPITAL & CANCER CENTRE

In the year 2014: Edition 1

Asian hospital have an unblemished transplant record be it 25 kidney transplants of 2014.

Asian hospital is equipped with a full range of modern medical technology and facilities.

Asian Centre for Gastroenterology

Asian Center for Renal Diseases successfully operated upon Akil Arts & saved his life.

An important development in the field of heart implant devices is that one can now opt for MRI safe devices.

More patients need help and the hospital can never have it. Many

Rapid birth defect corrected

Another important development in the field of heart implant devices is that one can now opt for MRI safe devices.

One of the most bizarre cases ever traced in India. 1.5 meter rope of hair was extracted from this beautiful 14 year old girl who was suffering intensely from hair related ailments.

Heart & Lung & other Major Vessels of the Heart

The New lease of life for kidney patient

A medical researcher has recently reported that a rare disease called Rapunzel Syndrome has been diagnosed in a 14 year old girl.

Asian Centre for Aesthetic

In 2013, a teenage girl from Nigeria was born with hair which was more than 1.5 meter long. The hair was so thick that it was almost impossible to move.

One patient who was suffering from heart attack was seen coming towards Asian Heart Centre with chest pains.

Another important development in the field of heart implant devices is that one can now opt for MRI safe devices.

Miniaturized heart devices is that one can now opt for MRI safe devices.

Hair loss is something we all encounter every day. By the age of 50, forty percent of men and thirty five percent of women have significant hair loss. Hair loss rates are on the rise and self-esteem, and changes our perceptions of our own self. With scientific breakthroughs in modern technology and advances in micro-surgical techniques, hair restoration is now an option for everyone. However, since hair is so important the last thing you want to do is to go in for a hair transplant and up with a bad transplant. Hair transplant is not only limited to men or female pattern baldness but also being increasingly done in such scars, surgical scars, alopecia due to inflammatory diseases. There are various types of hair transplant methods. Each procedure has advantages and disadvantages and only expert can help in choosing the right method for you.

1. The FUE or Follicular Unit Extraction - is an advanced, essentially painless hair transplant method which allows for the harvesting of individual follicles from the donor area without a scar or suture. Each session of treatment can last from two to eight hours depending on the number of hairs that are harvested. A single treatment can last from two to eight hours depending on the number of hairs that are harvested.

The vision at Asian Clinic is an investment in your smile's future. Asian Dental Centre is your doorway to a healthy, happy smile. Asian Clinic the most preferred clinic in South Delhi for an overwhelming response. Asian Clinic offers best-in-class healthcare services in a convenient and luxurious setting.

Preventive Health Checks @ Asian Clinic
For a Better Tomorrow

The prevalence of obesity, diabetes, hypertension, heart disease and cancer have increased manifold consequent to the daily changing from the era of modernization and urbanization to circumvent loss of healthy and to prevent disease or detect illness. 

Preventive Health Checks (PHC) These are specially designed keeping various factors in mind i.e. age, sex, family history, occupational and other known risk factors. To avoid a catastrophic event occurs. The aim of conducting a PHC is for early detection of diseases. The Diabetes screening package offered in time. The Cardiac or Hypertensive package conduct a complete non invasive cardiovascular check. Finally a cancer screening PHC has been specially devised to prevent or detect early breast and cervical cancer, in female patients and includes mammography and PAP smear. Cancer markers tests for cancer of prostate, every and gastrointestinal cancer have also been included.

The prevalence of diabetes, obesity, hypertension, heart disease and cancer have increased manifold to the daily stresses one faces and changes in our life style and dietary habits.

Most of these constitutional diseases start off very slowly and the patient is unaware of their presence until it is too late or a catastrophic event occurs. This has prompted many corporate institutions and Multi National Firms to ensure that their staff is checked periodically, to keep their experienced workers healthy and to prevent loss of effective man hours due to illness.

The vision at Asian Clinic is an expansion on this, with a view to make those facilities available to the common man, senior citizens & women who look after the home, children and those who are at risk for such disorders.

PREVENTIVE HEALTH CHECK (PHC) These are specially designed keeping various factors in mind i.e. age, sex, family history, occupational and other known risk factors.

To start a comprehensive and thorough health check package salaried for the corporate sector and for the common almements (Diabetes Mellitus, Hypertension, Obesity, Cardiac problems & Cancer).

The packages at Asian Clinic, are encompassing health checks for early detection of diseases. The Diabetes screening package offered in time. The Cardiac or Hypertensive package conduct a complete non invasive cardiovascular check. Finally a cancer screening PHC has been specially devised to prevent or detect early breast and cervical cancer, in female patients and includes mammography and PAP smear. Cancer markers tests for cancer of prostate, every and gastrointestinal cancer have also been included.

The prevalence of obesity, diabetes, hypertension, heart disease and cancer have increased manifold to the daily stresses one faces and changes in our life style and dietary habits.

Asian Clinic offers best-in-class healthcare services in a convenient and luxurious setting. Operated by highly qualified super specialists, Asian Clinic offers services such as Preventive Health Check-ups, Super Specialty Consultations and Diagnostic Services.
Nigerian Ambassador visits ASIAN HOSPITAL

ASIAN is among the most preferred destinations for International Patients coming to India. It was under this context that the Nigerian Ambassador, Mr. Fabius Akama paid a visit to the hospital to meet the staff and patients from his country. The ceremony was witnessed by the administration and the experienced staff of the hospital.

Events@Asian

Paint the World- Third Asian Drawing Competition

Inter school art and drawing competition was held at Asian auditorium and amphitheatre. The competition was open to school children from Delhi/NCR. Both the competitions drew a tremendous response.

Inter school debate and painting competition was held at Asian Health Clinic in Greater Kailash. The clinic was inaugurated by Shri Raj Babbar, Member of Parliament (MP) India has among the largest youth population in the world & the conference was an exercise in identifying the mortal dangers to this vast population.

Combating Renal Failure

Hardly two decades back kidney failure meant death. Most of the patients suffering from the disease were denied the chance of dialysis and a chance to live. However, today we have world class renal health care. The dialysis centers are comparable with the best in the world in terms of the art of medical science which are absolutely up to date.

A healthy couple should have a healthy child. What do you think is the wrong in having a healthy child? A better question may be: What do you think is wrong in being healthy? What is health? Health is not merely the absence of disease but the state of complete physical, mental and social well-being. It is a state of well being and not merely the absence of disease or infirmity.

In the last few years, new treatment options have been developed for fighting kidney failure. These treatments are collectively known as Renal Replacement Therapy but at an outrun cost which was out of reach for most Indians. Asian Institute of medical sciences with roots of quality care, has world class renal facilities. The dialysis centre is comparable with the best in the world in terms of the art of medical science which are absolutely up to date.
